Silk Clay Magnet Figures

Hang the entire family on the fridge door as magnets. The Silk Clay figure heads are modelled around a small piece of wood with a magnet (glue is not necessary) and the bodies are cut out with scissors and decorated further.

Model a head around a small piece of wood with a magnet. Do not cover the actual magnet.

Roll out or flatten the Silk Clay by hand and cut out the body parts with a pair of scissors. Assemble all the parts immediately.

Add details to the figures. You may make additional figures, for example, Dad's favourite cat which is modelled separately. Leave to dry and attach the cat with a blob of Silk Clay.
