## Wooden Hand Mirrors decorated with Foam Clay

It's easy to cover the front and the back of these small wooden hand mirrors with Foam Clay modelling compound.

Decorate the untreated wooden hand mirrors with Foam Clay modelling compound in different colours. You may decorate small areas at a time and don't forget to cover the back of the hand mirror as well.

You may add googly eyes or other decorations, pressing it into the Foam Clay before it dries. Remove the protective film from the front of the mirror once the Foam Clay has dried.
