Silk Clay insects as pencil head decorations

Make these small pencil head decorations by modelling a Silk Clay figure onto one end of a pencil. Here we have made a bumble bee and a ladybird.

Model bodies and details from Silk Clay as shown in the photo to make a bumble bee and a ladybird. The wings for the bumble bee are made from two flat wooden hearts. A TIP: make only one figure at a time to prevent the Silk Clay from drying out.

Attach the details with a light pressure.

Attach the body onto the flat end of the pencil.

Attach the eyes and the wings by pushing them into the figure. Silk Clay sticks onto wood and papier-mâché when it is damp.
