Photos of Children in Silk Clay Flowers

The corolla is shaped from Silk Clay. A printed photo of a child's face is attached in the middle. The stem and leaves are made from green Silk Clay shaped around a wooden flower stick and then pushed into a flower pot lined with brown Silk Clay soil.

01 Roll a ball of Silk clay and push it flat. Attach a printet and cut out photo of a child's face. Roll a thin sausage and place this around the photo to hide the transition.

02 Make petals by rolling small uniform balls of Silk Clay and put them against the ball with the photo – all the way around. Leave to dry.

03 Roll green Silk Clay into a long sausage shape. Model it around the flower stick for a green stalk.

04 Make the flower's leaves from green Silk Clay, shaped like a cone. Press the cone flat. Make two leaves.

05 Press the leaf around one end of a wooden flower stick. Shorten the flower stick at an appropriate length. Leave to dry.

06 Push the finished stalk onto the stamen from underneath.

07 Use brown Silk Clay for the soil and push it into the flower pot.

08 Push the flower and the leaves into the brown soil in the flower pot.
