

## Painted wooden Hooks with Graphics using Templates

These wooden hooks in different sizes are painted with Plus Color craft paint and some are painted with blackboard paint. All (except the one with the blackboard paint for drawing with chalk) are decorated with text and graphics using templates. The craft paint is applied gently with a foam stencil brush.

Apply one or two coats of Plus Color craft paint to the hook in one colour and leave to dry between each application. Place the template with numbers and letters on top of the hook. Saturate the foam stencil brush with the same type of paint in a different colour and carefully dab the desired number/letter onto the hook. Remember to leave to dry between applications to avoid the print smudging.
