A painted Tray with Glass Mosaic

This tray is painted with white Plus Color craft paint. When dry, the base is decorated on the inside with small mosaic glass fragments using white mosaic filler.

Paint the tray all over with white Plus Color craft paint. Apply two coats. Allow to dry between each coat.

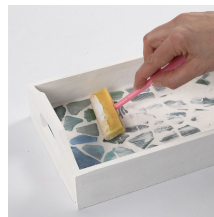

Use a spatula to apply a thin layer of mosaic filler to the inside base of the tray. A TIP: As an alternative for attaching the small glass mosaic fragments in the mosaic filler, you may use Clear Multi Glue Gel.

Place the glass mosaic fragments in a pattern according to your imagination onto the prepared inside base of the tray, leaving a 2-3 mm space between each. Leave to dry for a minimum of 30 minutes.

Apply the mosaic filler over the tiled area working it into all the spaces using a spatula. Leave to dry for approx. 10 minutes.

Remove any excess mosaic filler with a damp sponge.

Rub the glass fragments using damp kitchen roll to clean thoroughly.

Tray, size 30x17x5 cm, inner size 27.5x15x4 cm, paulownia, 1pc 575300

Mosaic Filler, white, 1000ml 28455
