A Keyring Fob from a Leather Cord with painted wooden Beads

This keyring fob is made from a leather cord, decorated with various large beads. Some are made from untreated wood and some are painted with Art Metal paint in pastel colours.

Paint some beads with Art Metal paint. Thread each of these onto a flower stick (a helpful tool) and apply two coats of paint to the bead, allowing the paint to dry between each coat.

Mix the untreated wooden beads with the painted beads and thread them onto the leather cord. Finish with a knot at the bottom and trim the excess cord.

Cut a piece of leather cord measuring approx. 30 cm and tie it tightly onto a split ring. Finish with a tight knot as close to the split ring as possible.
