A Clasp Purse from faux Leather Paper

This purse is made from faux leather paper using a template and the instructions included with the purse clasp. Decorations are punched out using the die-cutting machine. They are glued onto a brooch back and then attached onto the purse for decoration. Alternatively they are attached onto a keyring.

Sew the purse around the clasp using the template and sewing instructions included with the purse clasp.

Punch out designs from faux leather paper using the die-cutting machine.

Glue the punched-out designs onto a brooch back with a glue gun and attach to the purse for decoration.

Attach the punched-out design onto a keyring using a round jump ring by twisting it with two pliers.
